

Living Things and Their Habitats

How are animals adapted to their habitats?

 living	 non-living	 dead	 animal	 habitat	 food chain
--	---	---	---	--	--

Dead or Alive?

A living thing is alive.

A non-living thing has never been alive.

A dead thing was alive but not anymore.

Habitats

For an organism to be alive it must do all 7 parts of MRS GREN.

MRS GREN

- Movement:** All things move, even plants.
- Respiration:** Getting energy from food.
- Sensitivity:** Detecting changes in the surroundings.
- Growth:** All living things grow.
- Reproduction:** Making more living things.
- Excretion:** Getting rid of waste.
- Nutrition:** Taking in and using food.

Micro Habitats

Under a log

Nest

Pond

Food Chains

Food chains show the order of living things eating each other.

The grass is eaten by the rabbit, and the rabbit is eaten by the fox.
