

Year 1 & 2: Animals Including Humans

All animals need three basic things to stay alive:

Healthy

Nutrition

Diet

Exercise

Growth

Survive

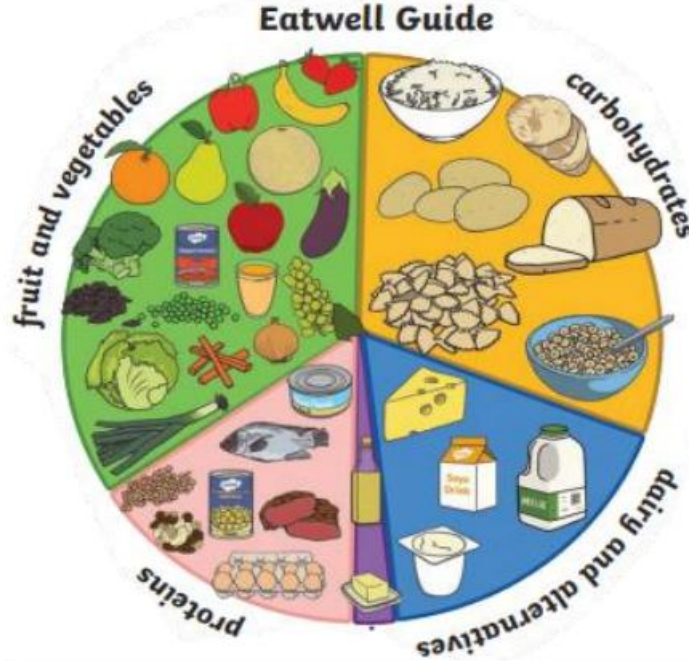

Offspring

Life Cycle

Hygiene

It's important to eat a balanced **diet** to stay healthy.

Some animals give birth to **live young**.

Other animals lay eggs which the **young** hatch from.

Some **offspring** look like their **adult** when they are born.

Some **offspring** do not look like their **adult** when they are born.

All **young** animals change as they go through the different stages of their **life cycle** and grow into **adults**.

It's important to have good **hygiene** to keep germs from spreading.
