

# Why is our World Wonderful?

Spring term 2 2023-2024

Key Vocabulary	
<b>goal</b>	Something to complete in the future.
<b>mass</b>	The amount of matter an object contains. The more matter something has, the more it will weigh.
<b>capacity</b>	How much a container can hold.
<b>compare</b>	To find things that are the same or different between two things.
<b>float</b>	When something can rest on top of liquid without going under.
<b>sink</b>	When something drops below the surface of liquid.
<b>landscapes</b>	What you can see when you look at the area of land.
<b>climate</b>	What the weather is usually like.

Who are these people? Can you tell a grown up about where they live?

## Facts and Knowledge

Our World is amazing and constantly changing. As we move between seasons we notice changes in the natural world. During Winter the weather gets colder, some trees become bare and frost appears on the ground. In other countries the weather can be quite different. The sun shines on some countries more than others, like Africa. In Africa it is very hot and dry. The landscape is very different to Tetbury. Africa has stunning animals that we only see when we visit zoos or wildlife parks like lions, tigers, zebras, elephants and giraffes. There are many other differences between Africa and Tetbury, our homes are very different to those in Africa and so are the types of food we grow and eat.
