

17th November 2021

Dear Parents and Carers,

Year 5 – WonderDome Experience

During the last two terms, the children have enjoyed our 'My Place in Space' topic where we have learnt all about the solar system, space, the moon landing, forces and scientists. On Friday 10th December, we have booked the WonderDome to visit St Mary's where the children will experience an interactive Planetarium Show to enrich their learning. The show investigates the sun and reveals some incredible facts about our nearest star. We will also look closely at The Moon, our nearest neighbour, and discover how important it is to live on Earth and why it appears to change shape. We also find out what it is like to live on a spaceship and enjoy the experience of being weightless! The night sky is projected inside the dome where the children will learn how to identify certain stars and constellations.

To cover the cost of this exciting activity, we are asking for a voluntarily contribution of £6.09 to be paid via Parent Pay.

Thank you for your continued support.

Miss Browning, Mrs Wheeler and Mrs Withers
