

Our Vision for Science at St Mary's: Life should be lived in all it's fullness (John 10:10) and so science should be full of 'Wow' moments! Science should light the flame of curiosity. Science should be fun as we discover more about the world around us.

Everybody is inspired by the awe and wonder of God's amazing world.

Our Principles for Science at St Mary's:

- Active lessons where everybody can get 'hands-on'
- Learning outdoors
- Asking questions, being curious
- Working in-role as different types of scientists
- Making links to previous experiences
- Working together
- Different types of investigations
