

Year 3 – Homework – Term 5 and 6

These optional activities are designed to help engage your child in our current topic whilst they are at home. They are supposed to be enjoyable and completed by the child. Please wait until the exact date to bring to school.

Skeleton

As part of our term 5 science, we would like the children to investigate skeletons. This might be researching and then sketching what the skeleton of the favourite animal looks like or perhaps making a moving model as in the video in the QR code. Up to you!

Due – Tuesday 9th May

Bee B & B

As part of our learning about plants, we will be learning about the importance of pollinators. It would be great if you are able to create a home for pollinating insects in your garden, or as some people call them, a Bee B&B. Entirely up to you what your pollinator home looks like or is made out of. You can either bring it in or put a photo on seesaw. I look forward to seeing what you do!

Due – Tuesday 13th June

Plants

In term 6 we will be learning all about plants. During term 6, it would be great if you could plant some seeds of your own and keep a weekly diary of some form. This could be sketches each week of any changes or you could take a photo each week and stitch them together using an app like iMovie. Entirely up to you! We will

have a sharing session where you will be able to tell us about/show us your plant. You can bring it in if you'd like, but it may be a bit big!!

We look forward to seeing what you grow.

Due – Tuesday 4th July
