

Maths

Number: Place Value (within 10) we will start with sorting by colour, shape and size and then move onto more than and less than. Once the children have a deeper understanding of those concepts the children will move onto addition and subtraction within 10.

Phonics

We are going to continue developing our phonic knowledge. The children will be assessed for their current understanding and put into relevant lesson groups. We use the 'Read Write Inc' scheme of work.

Science

We will be focussing on the four seasons and thinking about the weather associated with each of them. After half term we will be looking at the basic structure of common trees and flowers.

Religious Education

Our Cristian Value this term is 'Caring'. This will be the focus of our online worships this term and the stories that we read. The big question - Who cares for you? What do you care about? We will introduce the children to the concept of 'Creation' with the question, who made the world?

Where on Earth?

Geography

To tie in with science we will be identifying seasonal and daily weather patterns in the UK. We will also be looking at identifying the 7 continents and 5 oceans. We will do this by looking at simple maps and using directional language to describe features.

History

We will be considering changes within living memory by comparing toys that children have now to toys their grandparents may have had. We will also be comparing methods of communication.

Phonics

We are going to continue developing our phonic knowledge. The children will be assessed for their current understanding and put into relevant lesson groups. We use the 'Read Write Inc' scheme of work.

Science

We will be focussing on the four seasons and thinking about the weather associated with each of them. After half term we will be looking at the basic structure of common trees and flowers.

English

We start the term with the story 'The Secret Sky Garden' thinking about our place in the world and how that makes us feel. We then move onto the 'Around the World with Max and Lemon', a journey story that will support our geography focus. The children will explore fiction and non-fiction texts and understand the differences between them.

Physical Education

The children will be developing their Fundamental movement skills including running, jumping, cross body co-ordination and moving safely within a space. We will also discuss how we feel when we exercise and how it helps us to stay healthy.
