Lifecycles

KEY VOCABULARY

Germination	When the conditions are right, the seed soaks up water and swells, and the tiny new plant bursts out of its shell. This is called germination.
Shoot	A shoot grows upwards from the seed or plant to find sunlight.
Seed dispersal	Seed dispersal is when the seeds move away from the parent plant. They can be moved by wind or animals.
Nutrition	Food or nourishment. Plants make their own food in their leaves using sunlight.
Balanced diet	A variety of foods from different food groups.
Lifecycle	The changes living things go through to become adults.
Reproduce	When living things make a new living thing of the same kind.
Growth	The process of increasing in size.
Hygiene	Maintaining health and preventing disease through cleanliness.
Observation	Closely looking and listening to something.
