Key Questions

What is a habitat?

What is a micro-habitat?

How do animals and plants depend on each other?

Core learning and procedural knowledge

- ◇ Explore and compare differences between habitats and microhabitats.
- ◇ Create simple food chains that begin with a plant.
- ◇ Identify and classify species of animals and plants.
- ◇ Use observations and ideas to suggest answers to questions.
- ◇ Recognise characteristics in animals that help them survive.

Dead or alive?	
Living	A living thing is alive. It is called an organism 
Dead	A dead thing has once been alive 
Non-living	A non-living thing has never been alive 

Food chains

A food chain is a diagram that shows us how animals are linked by what they eat.

The grass **is eaten by** the rabbit. The rabbit **is eaten by** the fox.
