## Seasonal Change

How does weather change with each season?

### The Four Seasons

#### autumn

September  
October  
November

#### winter

December  
January  
February

#### spring

March  
April  
May

#### summer

June  
July  
August

## Key Vocabulary:

### Seasons

There are four seasons each year, **autumn**, **winter**, **spring** and **summer**.

### Autumn

In autumn, the weather begins to get colder. The leaves start to fall from the trees. The amount of daylight becomes less.

### Winter

In winter, the weather is much colder. Deciduous trees lose their leaves and have bare branches. The daytimes are the shortest of the year and the night times are the longest.

### Spring

In spring, the weather starts to get warmer. Deciduous trees begin to grow leaves again and some trees may blossom. Plants begin to grow and you may see baby animals. The daytimes get longer.

### Summer

In summer, the weather gets hotter. The trees are full of leaves and there are lots of flowers and insects. The daytime is long and the night time is the shortest.

### Weather

The weather includes the **temperature** outside, the **wind** direction and strength, as well as **rain**, **cloud** and **sun**.

## Key questions

How many seasons are there? Can you name them?

What season are we in now? How do you know?

Look outside, can you describe the weather today?
