

Maths

Number: Place Value (within 10) we will start with sorting by colour, shape and size and then move onto more than and less than. Once the children have a deeper understanding of those concepts the children will move onto addition and subtraction within 10.

Religious Education

Our Cristian Value this term is 'Caring'. This will be the focus of our online worships this term and the stories that we read. The big question - Who care for you? What do you care about? We will introduce the children to the concept of 'Creation' with the question, who made the world?

PSHE

We are using a recovery curriculum which will support the children to settle back into school routines. The children will have the opportunity to share their understanding and ask questions about the Corona Virus, managing worries, reconnecting with friends and being positive.

History

Through the stories that we read there will be opportunity to observe differences in how people dressed, talked and activities that were enjoyed in the past and how they compare to what people do today. Observing changes over time.

Phonics

We are going to continue developing our phonic knowledge. The children will be assessed for their current understanding and then we will teach to help them close the gap on the time that has been lost, recapping a sound each day. We use the 'Read Write Inc' scheme of work.

Science/ Geography

The two subjects will combine over the theme of weather. Describing weather across the seasons in the UK. We will also be exploring where we are in the world looking at maps and their features.

Where on earth?

English

We start the term with the story 'Here we are' thinking about our place in in the world and how that makes us feel. We then move onto the 'Jolly Postman', a journey story that will support our geography focus. The children will explore fiction and non-fictions texts and understand the differences between them.

Physical Education

The children will be developing their Fundamental movement skills including running, jumping, cross body co ordination and moving safely within a space. We will also discuss how we feel when we exercise and how it helps us to stay healthy.
