

My Place in Space

What do we know about the universe?

The Promise by Nicola Davies is a whole school text to read. All KS2 classes will read and share this book during the first week of term, learning how to care for each other and our world.

READING FOR PLEASURE
We will read The Jamie Drake Equation by Christopher Edge as our class book. This book will also provide stimulus for guided reading.

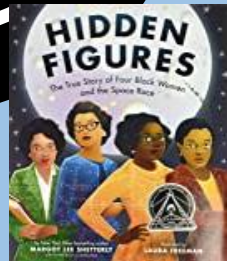

The War of the Worlds (Usborne) based on the novel by H.G. Wells is our core novel. It will provide stimulus for our narrative writing unit.

This is one of four texts that will be used across the whole school during Remembrance Week. Writing outcomes will be based on this text.

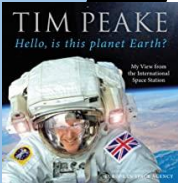

Dr Maggie's Grand Tour of the Solar System and Hidden Figures will provide stimulus for our non-fiction writing units.

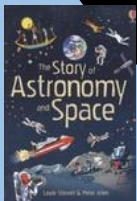

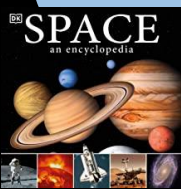

Year 5's AUTUMN Reading Road

A caring, curious and courageous curriculum.

These are some of the non-fiction texts which will inform our writing as well as our topic and science lessons.

Where Once We Stood will support our writing as well as our art where we will look at how the illustrator has created images from descriptions of the moon landings where astronauts showed incredible **courage**.

Year 5 will read, enjoy and recite a variety of poems this term, exploring the **curiosity** people have with the universe.
